## **User Manual**

Please read this manual before using and  
save this manual for future reference.

Dear customer ,

Thanks for your purchase!Please read this manual carefully, and keep it for future reference.

Warning 

The disk must be clean. Please clean it if having dust. The disk must be cleaned by soft cloth, then put the disk into the device. Otherwise, the dust will be taken into the machine and it effects the machine to insert and eject slowly or not insert and eject.

## Acknowledgement

Thanks for purchasing our car DVD player! In order to use this system properly, please read this manual before using it. Keep this manual for the future reference.

## Warning

Keep the disc entry clean. You should clean it immediately if there is dust. Disc with dust must be cleaned by clean soft cloth before putting into the machine, otherwise, the dust will be taken into the machine together with the disc from the entry, which may influence the drive of the machine, and cause the entrance problems of the disc. The dust may dirty the laser head resulting in the poor read or failed read of the disc.

## Instructions for Installation

This DVD play is designed for operation on 12V-14V DC negative ground system only. Make sure your car is fit for this negative ground system before installation (Detailed instruction for installation, please refer to page 37).

Remove the [-] power supply of the battery ground wire before installing this DVD, so as to decrease the rate of damaging the machine because of short circuit.

Follow the wire color on the installation manual to connect the line. Wrong connection may cause the machine malfunctions or damage the car electrical system.

Lead wire [-] of speaker must connect to the [-] terminal of the speaker. Do not connect it to the car or other lines.

Do not block the vent or louver board to avoid the fire caused by the overheating inside the machine.

When you start to use the DVD after the installation completes (Including after you have changed the battery), you should use a small round tool to press the RES button on the panel to restore the system to the initial settings.
